How to create a terrace on a flat roof or over a garage?

1 Laying WARCO tiles on roofing felt or membranes.

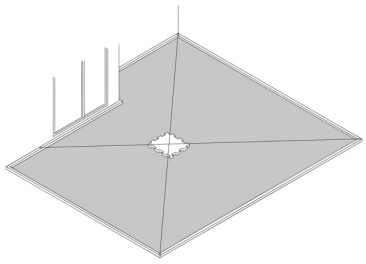

1 First of all: unpacking, sorting and laying out the tiles.

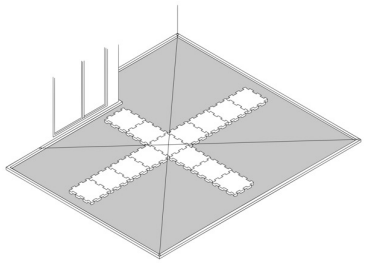

2 Levelling out irregularities in the waterproofing.

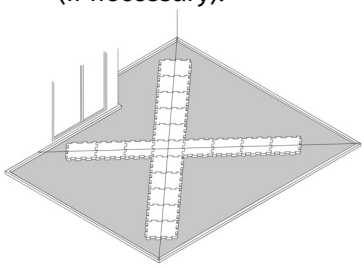

3 Determining the centre of the surface and laying the first tile.

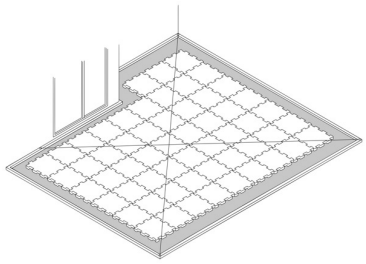

4 Laying the tiles along the longitudinal and transverse axes.

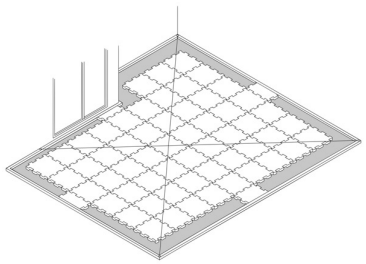

5 Checking alternative laying pattern (if necessary).

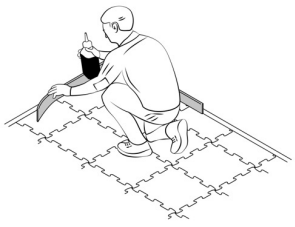

6 Laying whole tiles on the surface.

7 Cutting and laying of edge and corner tiles.

8 Fixing the skirting boards (if provided).

9 Enjoy the terrace.
