

Safety tile S 80 mm

Product Code: FS80

Net Price: £62.35 / m²

Gross price: **£74.20 / m²**

characteristic

properties

- fall protection ≤ 230 cm (in accordance with EN 1177),
- pleasant, elastic feel when walking, just like on forest floor
- absorbs sound and vibrations
- water-permeable and quick to dry; tile underside facilitates drainage
- heat- and cold-insulating
- weatherproof, frost-resistant, partly uv-resistant
- slip-resistant in wet and dry conditions
- easy to maintain, self-cleaning (with rainwater)
- reusable, very economical
- for indoor and outdoor use

installation

- on a [bound subfloor](#) (e.g. concrete, asphalt, tiles, composite panels, roof foil or felt, sheet metal)
- tiles should be secured by gluing them to each other or to the subfloor
- plastic connectors are supplied free-of-charge with the tiles; they can be helpful in installations in half-offset
- do-it-yourself or hire a local handyman

typical applications

play & sport

- playground, fall protection by critical fall height up to 230 cm
- under climbing or bouldering walls
- play area in a daycare centre or kindergarten

technical data

size
